

Static Mattresses

When choosing a mattress, it is important to consider the effects of that mattress on skin protection.

Ola™

The Ola Quantum & QuantumPlus is an anti-decubitus mattress designed to provide exceptional pressure reduction and patient comfort, and uniquely conforms to the profile of an electric wardbed. Reduces inappropriate and unwanted patient movement, thereby reducing the potential for tissue damage resulting from shear and friction forces, particularly on vulnerable areas.

SelMed™

The SelMed is a static replacement mattress ideal for patients with a medium to high risk of developing pressure ulcers.

Its multi stretch and vapour permeable fabric with welded seams makes the SelMed an essential addition to any pressure ulcer prevention policy.

SelMed has additional benefits over the SelfFlex.

MEDIUM TO HIGH RISK

First of all, the SelMed mattress is a non-turning system! SelMed uses a combination of high density foam and visco elastic memory foam to deliver exceptional pressure reduction and provide superior patient comfort.

SelfFlex™

The SelfFlex is a static replacement mattress and is suitable for patients with a low to medium risk of developing pressure ulcers.

Using high density foam, the SelfFlex delivers effective pressure reduction and is used as a first line prevention of pressure ulcers.
